- **Programming Language:** Java , C++ , JavaScript , PHP
- **Frontend :** HTML,CSS, React , Tailwind , Figma
- **Backend :** Node.js , PHP
- **Database :** PL/SQL , MongoDB
- **Tools:** VS Code ,Git
- **Data Structure**
- **API**

LANGUAGES

- English (Fluent)
- Hindi (Fluent)
- German (Basic)

SOFT SKILLS

- Communication
- Teamwork
- Leadership

PROFILE

An enthusiastic and motivated learner with strong coding and communication skills, I am eager to acquire practical experience in a real-world setting. I am passionate about developing my technical abilities while collaborating with others to solve complex problems.

WORK EXPERIENCE

SafeHer - Women Safety Application ([Github](#)) 2025
Personal Project

- Developed SafeHer, a cross-platform women's safety app using React Native & Expo with real-time emergency alerts.
- Integrated Firebase, Twilio, and Google Maps APIs for secure authentication, emergency communication, and live location tracking.
- Implemented voice-triggered alerts, panic button, and automated notifications, ensuring swift responses in critical situations.

Jazzify ([Github Link](#)) 2024
Personal Project

- Engineered a music streaming platform with HTML, CSS, JavaScript and PHP enabling seamless user login through email and Google OAuth integration
- Integrated Spotify API , complemented by locally stored pre-downloaded songs for an extensive music library and implemented search functionality.
- Audio player supporting features like auto-loop, playback speed control, song downloading.
- Designed and maintained a MySQL database to manage user profiles, playlists, and downloaded songs, ensuring high data consistency
